Xplore

Camera with Wrist View Remote

Never misframe a video or photo again. Unlike traditional Point-of-View (POV) cameras, the Xplore camera is viewable from your wrist. The watch doubles as a wireless live viewfinder and remote control. Ideal for use as an action camera or for capturing those selfie moments. Connect and view up to six cameras per watch.

The camera utilizes built-in WiFi to connect to smart phone apps. Using the ActionCam! app, users can view and record live video through their device. Sharing to social media takes seconds.

Technical Specifications:

Video Recording:
• 1080p 60 fps
• 1080p 30 fps Ultrawide/Wide/Narrow
• 720p 120 fps, 720p 60 fps, WVGA240
